Drives (Rainmeter Widget)
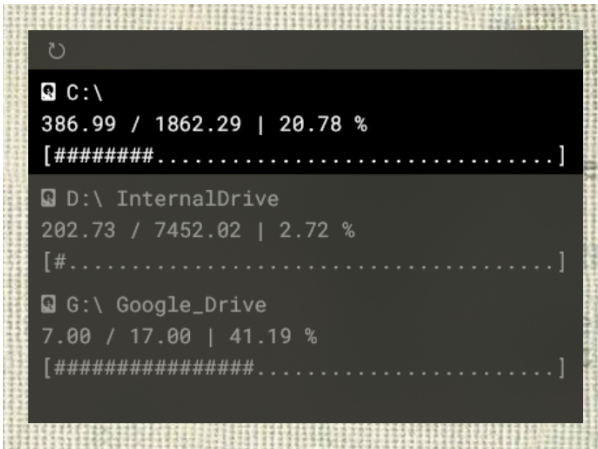

this is a python script that will generate a rainmeter widget based on your drives

requirments

- python 3.0 or higher

instructions

1. unzip and place the files within the rainmeter skin directory.
    - C:\Users\username\Documents\Rainmeter\Skins\drives
2. run refresh.cmd

```
python C:\Users\
<username>\Documents\Rainmeter\Skins\drives\create_drives_v?.?.py
```

or

```
cd ~\Documents\Rainmeter\Skins\drives\create_drives_v?.?.py
```

3. use rainmeter to load the widget

todo

maybe i'll get around to doing these.

- message me or something and suggest something.
